

Roofgrip

Roofgrip walkway mat is ideal for providing safe access on single ply flat roof systems.

The 14mm height of the matting provides permanent slip resistance - even in areas where water may pool.

Roofgrip is impervious to all weather conditions and compatible with all roof systems (TPO/PVC/EPDM/Felt/Asphalt etc) as it is not adhered or bonded to the membrane/roof surfaces.

Available in black or grey - widths 610-910mm and 1220mm x 10mt long.

- Permanent slip resistance.
- UV resistant
- Protects roofing membranes
- Open grid and self draining
- Easy to lay and maintenance free

Technical Data

Sizes & weights	Length	Height	Widths			Weight
	<i>tolerances</i> 0/+0.3	0/+0.5	+/-1 *(FEFS 0 to +2)			
	<i>All dimensions are nominal</i>	m	mm	cm		
Roofgrip	10	14	60	91	122	6.6
Appearances	Roll grid products; Open grid “duckboard” design with textured surface.					
Durability	Roll grid products; One piece welded construction for maintenance free life.					
Workability	Available in rolls Easy to cut to size and shape					
Slip Resistance	ASTM F 1677			(0.6/0.5)		
UV light	Resistant to PVC degradation					
Wind Stability	Tested by the University of Hertfordshire (school of Aerospace, Automotive & Design Engineering)			Stable in Hurricane Force 12 wind speeds		

Other Products we supply:

- Single Ply Membrane
- Torch on Roofing Felts
- Decking
- Composite Panels
- Rooflights – Single Skin in all Profiles and F.A.I.R.S
- Tapered Roof Systems
- Insulation - PIR/Rockwool/Extruded polystyrene
- Fabrications
- Purlins
- Fibre Cement Sheeting
- Vapour Barriers
